

CasingManager App

Casing identification via camera

These days, you do almost everything on your smartphone. So why not collect your casings this way too?

At Continental, we believe that your time is too precious to be hanging around the yard, pen and paper in hand, tediously writing down tire data. That's why we've developed the CasingManager app.

All the benefits at a glance:

- ⊕ **Record tire data using your smartphone camera**
- ⊕ **Low manual effort**
- ⊕ **Use different addresses for billing and collection**
