Quiet ride with year-round traction, even in light snow.

For Crossovers and SUVs.

Technical highlights:

Substantial road noise reduction for a smooth and quiet everyday ride.

The CrossContact™ RX reduces the road noise for a quiet everyday ride. This is made possible by a harmonised sipe distribution which leads to an even footprint pressure in the tyre's contact patch.

Excellent wet braking performance.

Short braking distances on wet road surfaces are ensured by a large number of biting edges. The highly siped pattern increases the grip by means of improved water displacement between the blocks and the road surface.

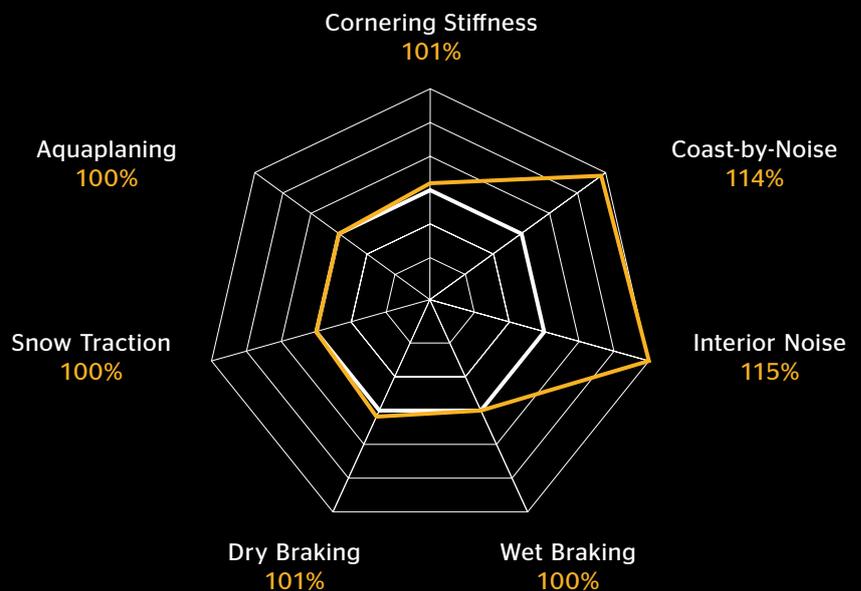

Enhanced snow and wet traction for better driving safety.

Thanks to U-shaped sipes with a 3-D element, this tyre provides enhanced snow traction in all directions and excellent wet traction without sacrificing dry performance.

Tyre performance:

— CrossContact™ RX
— ContiCrossContact™ LX Sport = 100%

Tyre dimensions:

Example of vehicles we provide with original equipment.

Model	Size*	EU-tyre label value			
				dB	
Jeep Renegade	215/60 R 17 H FR	C	C	71	2

* More sizes will be available in 2019

EU tyre label categories: = Fuel consumption, = Wet grip, **dB** = Value in decibels, = Class. You can find further information at www.tyre-label.com
