

**When Everything Counts**

## UltraContact® UC6

Perfect as a Diamond!

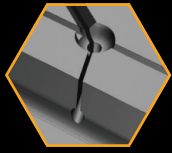

- > Outstanding control on wet roads.
- > High margins of safety during braking, on wet and dry roads.
- > High levels of grip and durability.
- > Enjoyable driving thanks to low levels of noise.

# UltraContact® UC6

Perfectly balanced performance.

## Technical highlights.

### Reduced risk of aquaplaning

Improved safety on wet roads thanks to the Aqua Channels that accelerates water evacuation into the main grooves of the tyre.

Reduced risk of aquaplaning thanks to the Aqua Drainage elements that are strategically positioned to quickly move the water through a tube system into the tyre grooves.

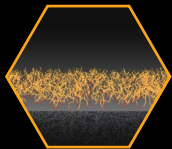

### Diamond Edge Pattern

The Diamond Edge Pattern maximised contact with the road when braking resulting in improved braking performance in both wet and dry road conditions.

### New noise breaker technology

New noise breaker technology that interrupts the sound waves in the grooves of the tyre resulting in a quieter, more comfortable driving experience.

### State of the art "Diamond Blend Compound"

State of the art "Diamond Blend Compound" technology contains more strands of grip polymers, which absorb more energy when driving that results in the required heat build up to generate improved levels of grip and safety. Added to the compound are mileage-polymers that ensure good mileage performance.
