

When Everything Counts

TechContact® TC6 & TechContact® TC6 SUV

The ultimate balance of performance,
everything you need for modern day cars and SUV's.

- > Excellent stability and grip in all conditions.
- > Outstanding wet braking performance.
- > Optimized track sequencing for low noise and a quiet and comfortable ride.
- > Durability and excellent wear performance, thanks to interlocking polymer compounds.

TechContact® TC6 & TechContact® TC6 SUV

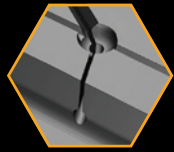

Everything you need for modern day cars and SUV's.

Technical highlights.

Diamond Edge Pattern

The Diamond Edge Pattern maximised contact with the road when braking resulting in improved braking performance in both wet and dry road conditions.

Reduced risk of aquaplaning

Improved safety on wet roads thanks to the Aqua Channels that accelerates water evacuation into the main grooves of the tyre.

Reduced risk of aquaplaning thanks to the Aqua Drainage elements that are strategically position to quickly move the water through a tube system into the tyre grooves.

New noise breaker technology

New noise breaker technology that interrupts the sound waves in the grooves of the tyre resulting in a quieter, more comfortable driving experience.

Venture further for longer

The polymer chains of the TC6 & TC6 SUV tread compound are entangled and connected to each other to form an interlocked polymer network. This improves the wear performance and robustness of the tread.

The tread compound of the TC6 & TC6 SUV contains silica reduces tyre rolling resistance for improved fuel efficiency.

Tyre performance.
