

# Your happy end to tire drama.

**The ContiMobilityKit:**

Sealed, inflated, and ready to roll.

# The ContiMobilityKit:

Sealed, inflated, and ready to roll.

The ContiMobilityKit is there for you when you need it most! No more waiting by the roadside or feeling helpless – just a quick, easy solution at your fingertips. Whether it's a nail, shard of glass, or another sharp object that's caused the puncture, with the ContiMobilityKit, your tire emergency has a happy ending.

- User-friendly repair kit designed to quickly seal and re-inflate punctured tires.
- Drive up to 200 km after puncture sealing.
- Maintain speeds up to 80 km/h.
- Seals damage in the tire tread caused by sharp objects with a diameter of up to 6 mm
- Original equipment quality.
- Engineered in Germany for top reliability.

## Steps for use:

1. Mount the sealant bottle to the compressor firmly.
2. Attach the hose to the tire valve.
3. Insert the power plug into the car's power outlet.
4. Place the safety sticker on the inside of the windshield, top left.
5. Start the car, then turn on the compressor to inflate the tire.
6. Sealant is injected into the tire to close the puncture.
7. Monitor the pressure using the gauge to ensure correct inflation.
8. Drive carefully to the nearest service station for a tire inspection.

The flat tire is **sealed**.  
The drama has a **happy ending**.
