

## UltraContact UX7. Chase the Extraordinary.

A tyre that delivers the versatility to turn your everyday adventures into extraordinary ones.

- > **XTRA** Safety when braking and cornering on both wet and dry roads.
- > **XTRA** Durability against daily wear and tear for a longer tyre life.
- > **XTRA** Quiet for a comfortable and enjoyable journey.

# UltraContact UX7.

Chase the Extraordinary.

Turn everyday drives into extraordinary adventures with the Continental UltraContact UX7. Engineered specifically for SUVs, this tyre is packed with advanced features that deliver XTRA safety, XTRA durability, and XTRA quietness—so you can enjoy every journey with total confidence. Whether you're navigating busy city streets or heading out on a weekend escape, the UX7's tailor-made fit adapts perfectly to your driving style.

## Technical highlights.

### XTRA Safety

#### > X-Force Macroblocks

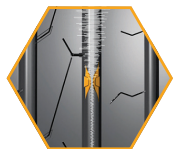

While cornering, a tyre's outer shoulder bears the greatest force and pressure. X-Force Macroblocks maximize the contact area with the road to create a wider footprint, then efficiently distributes the force to other parts of the tyre for better handling and stability.

### XTRA Durability

#### > Robust360 Construction

Tyres need to be able to withstand the heavier weight and load of an SUV through its entire lifespan, across various conditions from city roads to the occasional gravel or dirt path. The UX7's Robust360 Construction is designed to be more durable with a reinforced steel belt and sturdier carcass design.

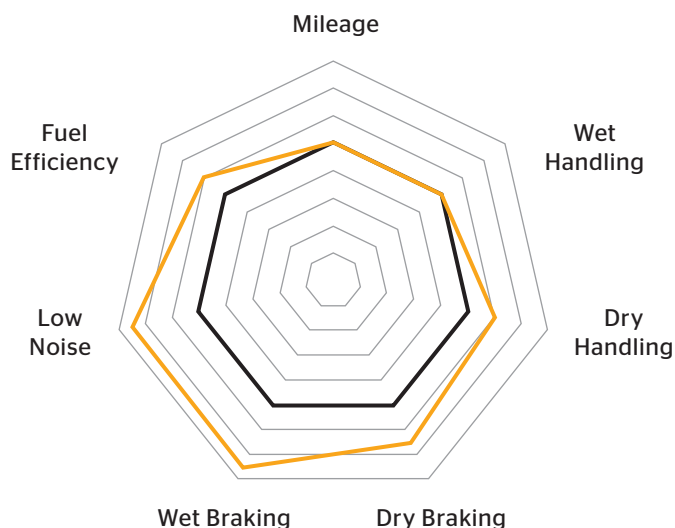

### XTRA Quiet

#### > Low noise performance

The UX7's tread design and asymmetric pattern reduce vibration resonance, resulting in superior low-noise performance. The inner shoulder tread features a highly structured sipe pattern, to minimise noise inducing vibrations, delivering a quiet and comfortable ride.
