

# Driving Pleasure To The MAX

Performance and Comfort, unrivaled

Conti *MAX* Contact™ MC5

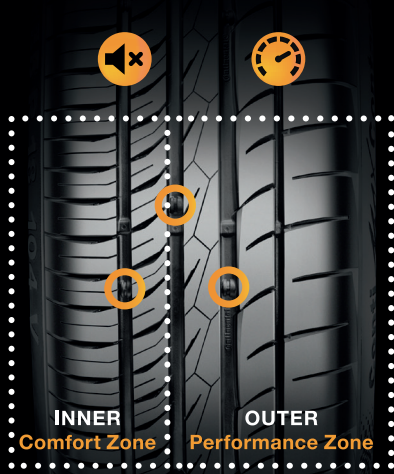

**Continental**

Tires – Engineered in Germany.

# Performance and Comfort, unrivaled

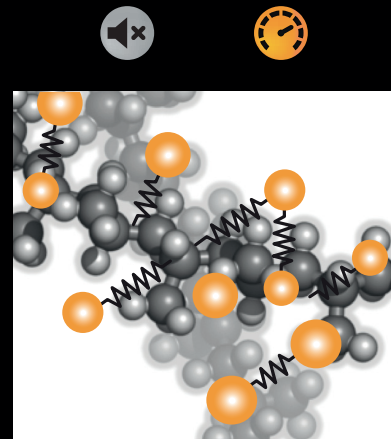

## Technical Highlights

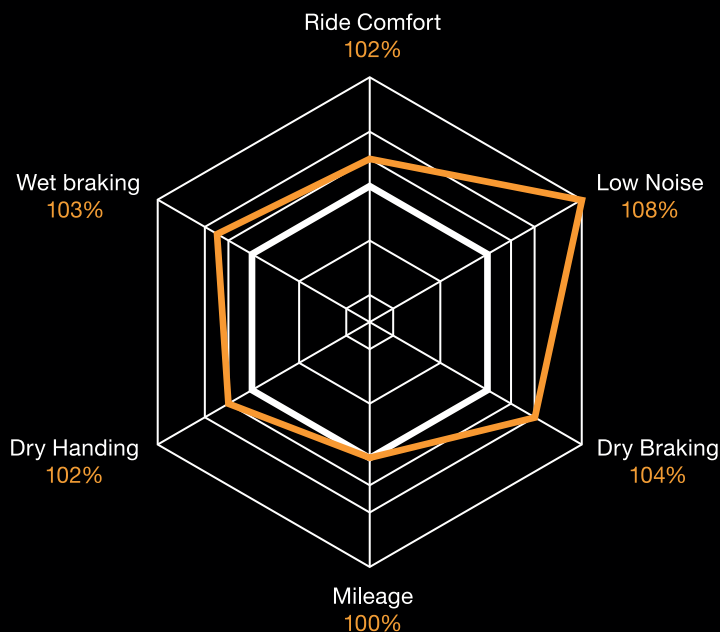

- **Extreme low noise with ride comfort and great performance**  
The noise breakers brake air-waves that create pipe resonance. The asymmetrical pattern layout keeps a low noise level and high ride comfort.

- **Superb high speed and dry handling stability**  
Chamfered edges on the large shoulder blocks prevent "roll in effect". This ensures tire stability while driving in high speed and under handling conditions.

- **Excellent wet grip performance**  
Activated Silica and a special blend of polymer formed a high stable polymer crosslink.

## Tire performance

- ContiSportContact 1
- ContiMaxContact 5
