

Continental 
The Future in Motion

When Everything Counts

When Perfection Counts
UltraContact™ UC6 SUV

- > High safety levels in both wet and dry conditions
- > Precise handling and direct response designed for SUV
- > Quiet and comfortable ride
- > Sturdy construction for exciting on-road adventures

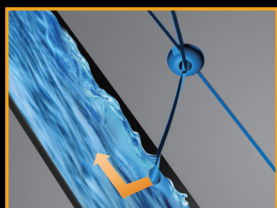

German 
Technology

UltraContact™ UC6 SUV

Feature and Benefit

Safety for Confidence in any Condition

Aqua Drainage and Aqua Channel

- > **Feature:** The Aqua Drainage system and Aqua Channel surface sipes work simultaneously to accelerate water evacuation into the main tread grooves.
- > **Benefit:** Superb braking and cornering grip on wet roads.

Chamfered Edge

- > **Feature:** The Chamfered Edges maximize contact area under dry conditions by evenly distributing braking pressure across the tread block and under wet conditions by wiping away water film.
- > **Benefit:** Better braking on dry and wet roads. Exceptional wet grip and handling performance.

Unleash your Driving Pleasure

Noise Breaker 2.0

- > **Feature:** The next evolution of the well-known Noise Breakers intercepts and splits sound waves for a muted effect.
- > **Benefit:** Comfortable ride with low noise level.

Double Tie-bar

- > **Feature:** The Double Tie-bar connects the blocks for increased stability and stiffness during braking and cornering to counteract the SUV's higher centre of gravity.
- > **Benefit:** Shorter braking distances. Direct feedback and stability when cornering.

Venture Further for Longer

Interlocked Polymer Compound

- > **Feature:** Interlocked Polymer Chains of the UC6 SUV compound improve the robustness of the tread.
- > **Benefit:** Outstanding wear performance.

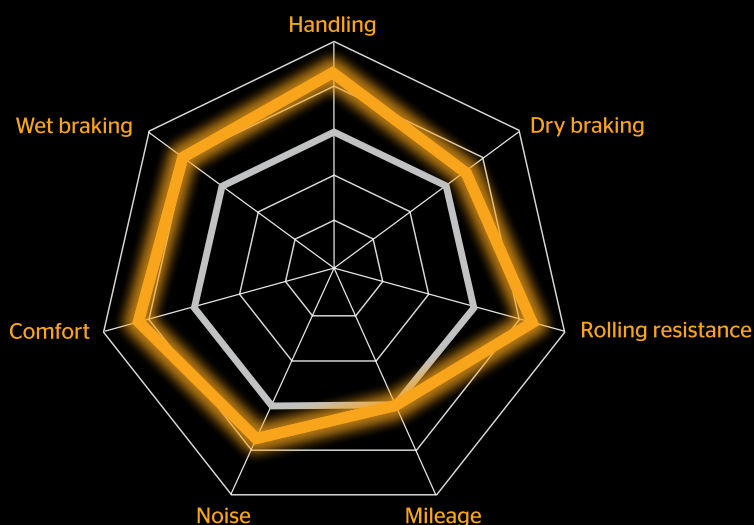

Advanced Silica Compound

- > **Feature:** Connected polymers in the Advanced Silica Compound reduce the movement in the tyre thus reducing energy loss caused by deformation.
- > **Benefit:** Improved fuel efficiency from lower rolling resistance.

Performance Comparison
