

Hours of Service // Superior Mileage // Durable Cut/Chip Compounding // Casing Durability

# Urban

## For Inner City Traffic & Short Distances

**Engineered for your application.** Urban tires are designed for inner city traffic applications where traction, hours of service and mileage are priority. Tires operating within this application normally operate through short distances experiencing heavy scrub. Tires are designed to withstand heat generation as well as heavy loads where safety is essential. Extra sidewall protection is required to protect the casing from curbing, cuts and abrasions. Casing durability is the key aspect for segment satisfaction.

**IMPORTANT NOTE:** Tire Products are now classified by route. Product details are subject to change, please visit our website or contact your local sales representative for the most up to date information.
