

# ContiConnect Tire Sensors & Mobile App

Maintaining full fleet control at any time in any place.

Ensuring efficient fleet operation depends on vehicle reliability out on the road. ContiConnect provides the data required to maintain a high level of tire performance while keeping you up-to-date on your fleet's overall tire health. It helps minimize your maintenance and fuel costs, while maximizing uptime, tire life and overall safety of your fleet.

In addition to Continental's best-in-class tire sensors, we also offer the powerful ContiConnect mobile app. With only a few finger taps you can receive all important data about your fleet's tire health on the device of your choice.

# Taking the guesswork out of tire maintenance with built-in features.

## Monitor from any place with the ContiConnect App.

Connect from your pocket to your fleet with your **iOS** or **Android** mobile device.

## Receive more data for better planning.

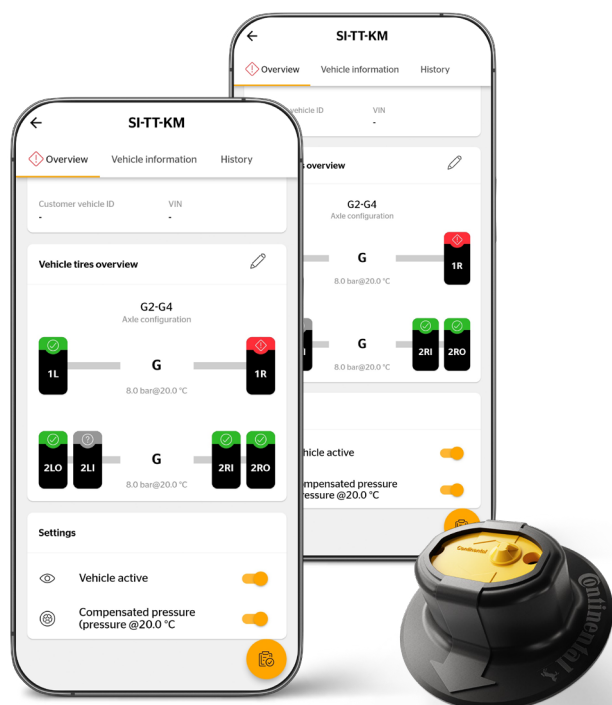

Be up to date on all tire data, including **mileage estimation**, **battery status**, tire pressure and temperature.

## Access information directly via Bluetooth connection.

Enjoy **wireless communication** and **auto-activation** with a battery lifetime of 4 years.

# Discover all possibilities of the ContiConnect App.

## Exceptional compatibility

You decide whether you connect fleet maintenance with your tablet or your smartphone. The app works with both iOS and Android.

## Up-to-date 24/7

Always stay in control and never miss important data or incidents by receiving tire alerts via push notifications.

## Smart data connection

Quickly view tire health data from anywhere with continuous data transmission to ContiConnect's secure cloud platform.

## Hands-on fleet overview

Create, configure and manage your fleet's vehicles with ease to identify and avoid potential breakdowns while reducing inefficiencies on the road.

## Comfortable check-ups

Speed up your vehicle's tire inspections with the app's Bluetooth connection and gain more data-based certainty in your tires' health.
