ContiConnect™ Live - get tire information regardless of the vehicle’s location.

The next evolutionary step of ContiConnect™ provides all the insights fleet managers need to keep instant control. Tire data are becoming conveniently accessible in real-time and with unprecedented flexibility. Learn more!

Challenge
Real-time requirements
Your vehicles do not return frequently to the fleet yard, but you still wish constant updates on the tires status.

Solution
Better connections with ContiConnect™
With ContiConnect™ Live you take advantage of the ContiConnect™ benefits in real time and receive notifications in case of urgent alerts. And with the ContiConnect™ Driver App you can do so, even if your vehicles are not yet equipped with a telematics solution!

Benefit
Real-time accessibility for faster optimization
ContiConnect™ Live provides 24/7 real-time tire monitoring that’s connected to the cloud. Which means, all data are immediately accessible via a web interface, so you can act faster and regardless of the vehicle’s location.
How it works

**Data collection**
ContiConnect™ Live is accessible either via the Conti Connect Driver App with bluetooth dongle or the Continental Telematic Unit.

**Data transmission**
ContiConnect™ Live transmits real-time sensor data over-the-air to the Continental backend.

**Data stream**
All data are displayed in the drivers’ cabin when using the bluetooth dongle and transmitted to the Continental backend as well.

Your highway to the cloud

Tire Sensor Central Control Unit

Secure tire intelligence in the cloud: the Continental Backend

Over-the-air data transfer to Continental backend

Android based Telematics or Mobile Device

Bluetooth Dongle

Tire Information in Web Portal or desktop application and reception of e-mail and SMS notification

Optionally, data are accessible to both the driver and the fleet manager

via App
via Continental Telematic Unit
