- Customized solutions to fit your specific fleet needs
- Fleet analytics and 24/7 roadside assistance

More than a tire company

Continental is also a leading vehicle technology supplier with expertise in vehicle dynamics, automated driving, electrification and connectivity

150
years of
innovation
+ progress

First company to develop a car tire with a patterned tread

First company to produce a truck tire with alternative natural rubber from dandelions

\$600

average cost of a roadside breakdown. Digital tire monitoring can reduce breakdowns up to 70%

*Actual results may vary

Top automotive supplier + Top tire supplier

No other company offers both kinds of engineering knowledge

40 lbs

Raw material saved in each retreaded tire, including rubber, steel, carbon black, and oil

35-60%

of fuel consumption is caused by rolling resistance. Continental is a leader in low rolling resistance tires, saving you money and fuel every day

1 billion

people (estimated) place their trust in Continental every day

75%

of all vehicles on the road contain at least one Continental product

60%

of an average vehicle is made of Continental components

Pioneering technologies and services for **goods transport, people transport and construction**, with a broad portfolio of **new tires, retreads and digital tire monitoring solutions** to fit your needs

Global

presence enhances synergies

Local

manufacturing and support from expert sales consultants

Keep your fleet rolling.
