

ContiPressureCheck™

On-Vehicle Tire Pressure Monitoring System

Increased Mileage

Longer Tread Life

Longer Casing Life

Reduced Roadside Breakdowns

ContiPressureCheck™ monitors a single vehicle in real-time, alerting the driver to tire pressure and temperature issues via an in-cab display. It is ideal for fleets whose trucks or buses are away from the terminal for long periods of time, and for owner-operators. Fleets benefit from extended tire and casing life, as well as increasing fuel economy and improving safety over the road.

How does it work? Tire-mounted sensors transmit tire pressure and temperature data. The data is displayed in real-time to the driver via a display screen mounted in the cab of the vehicle.

Extend the functionality of your ContiPressureCheck™ system

With Telematics Integration, display tire data remotely via any of our existing telematics partners: Zonar, PeopleNet, Geotab, and Road Ready. To learn more about our integration capabilities, visit www.continental-truck.com.
