

General Tire Testimonial - Crane & Tractor Services

The General Grabber OA & HT+ get the job done

Davis Motor Crane needs tough, durable tires for its fleet. Darion manages a fleet consisting of 400 tractors, 600 trailers, and 100 cranes. They offer crane sizes up to 600 tons, and need tires that can carry heavy loads.

“Our trailers and trucks are on the road 60% of the time and off road 40% of the time. When the fleet is at a job site, our operators are working in tight spots and prepping a tough ground. The Grabber OA works well in these rocky conditions.”

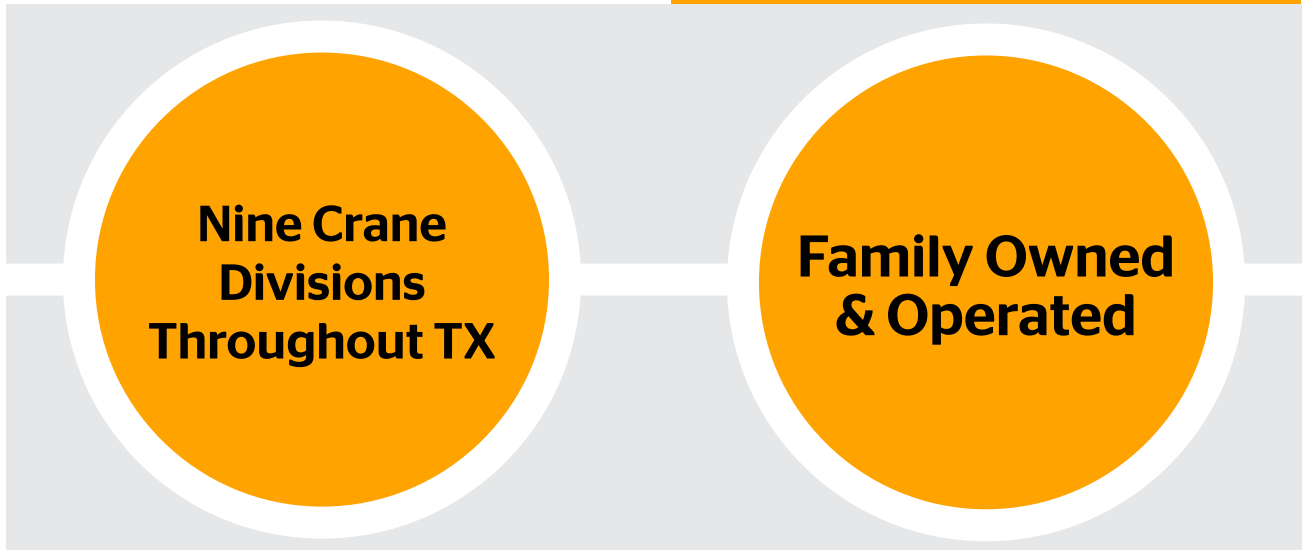

— Darion Atkinson, Tire Department Manager of Davis Motor Crane

The Future

Davis Motor Crane has been a long time, valued customer of Continental, and they have been open to trying new tires. They told me their Chinese manufactured tires were only lasting 6-7 months. The Grabber OA costs a little more, but tires are lasting up to 3-4 years.

“ We use the 255/70R22.5 General HT+. It's a heavyweight tire with a maximum load carrying capacity of 5510lb/120psi per tire. Our drivers say it creates a smooth ride and can handle tight turns on tough grounds without falling apart. Previously, another brand tires would only last 3-4 months and the General HT+ lasts a lot longer than that. **”**

“ Davis Motor Crane sees the value in our tires and more importantly values the partnership to help them improve their bottom line. **”**

— Malcolm Chalmers, Truck Sales Manager of Continental, US Truck
